

For holiday medication, can you buy what you need?

For tummy upsets, travel sickness and antimalarials have you thought about talking to your pharmacist and buying what you need?

Prescribing readily available medication to holidaymakers costs the NHS thousands every year, adding unnecessary strain to local GPs and the NHS. Processing these prescriptions can cost 20 times the price of buying identical medication at your local pharmacy.

Before you call a GP, talk to your pharmacist. You don't need an appointment and for most minor illnesses it's faster and easier.

If you take care of the little things, your NHS can keep taking care of you.
